

# FillerCollector™

## For gentle and effortless harvest of natural fat

In the past, fat harvesting was often a difficult, time-consuming process with unpredictable results.

But now, the all new FillerCollector™ simplifies the collection of injectable fat for autologous fat transfer. The FillerCollector™ is the most advanced fat harvesting system available for small to medium amounts of fat. The filterless, reusable collection device for fat harvesting, the FillerCollector™ is fast, easy and gentle on fat.

### The FillerCollector™ is a better way to harvest fat.

#### **Gentle**

- Gentle on fat to help improve the chances of long-term fat survival\*
- No centrifuging or other processing needed — saves time and protects fat cells from harm
- Pressure equalization inside container helps protect fat cells
- Gentle, passive blending of fat within container – improves fat consistency from multiple harvest sites

#### **Effortless**

- Simplified collection process
- Unique design continuously separates fat from rinsing fluid — no additional washing needed
- Easy fat extraction from the container
- Filterless — no clogging

#### **Efficient**

- Harvests high-quality fat\*\*, which is ready for immediate transfer
- Pre-filter traps fibrous strains for more homogeneous fat
- Sterile, closed loop system
- Robust and durable components
- Autoclavable
- Harvests 100 ml in just 10 minutes

### Gentle fat harvesting is the key to success.
